OTHER **EYE-HANDLE HAND AUGER**

POINT

- Designed to maximize the grip on the wood making it lighter to work with.
- Rectified edges improve its cutting capacity.

EYE

- Manufactured in two sizes according to the required effort.

DURABILITY

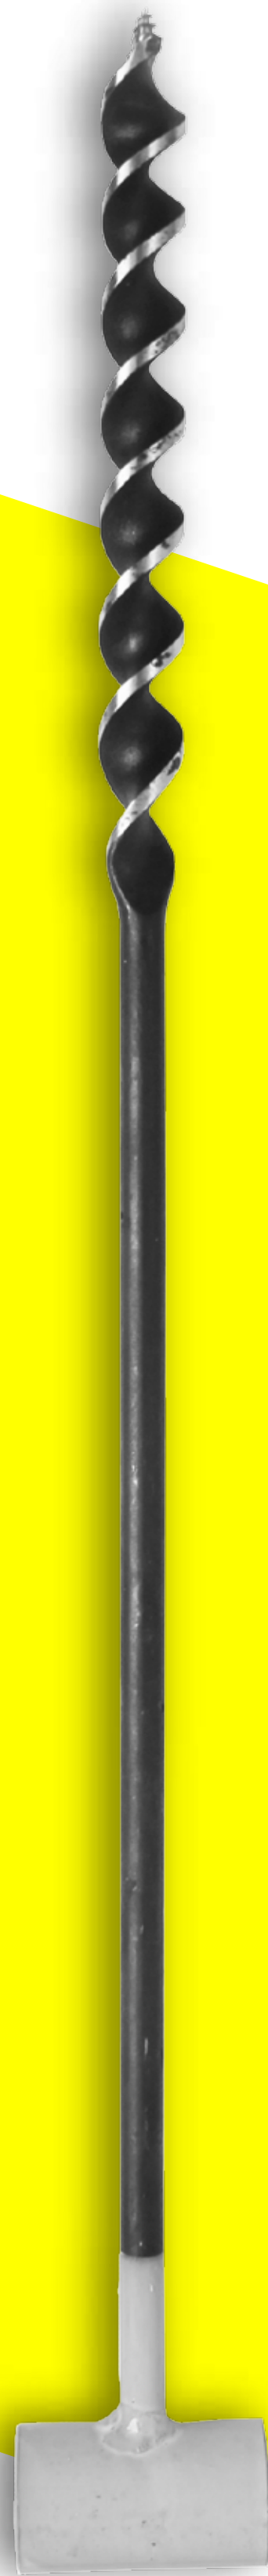

Its unique design gives the best relation between hardness and flexibility, allowing the maximum number of holes without breaking.

SPIRAL

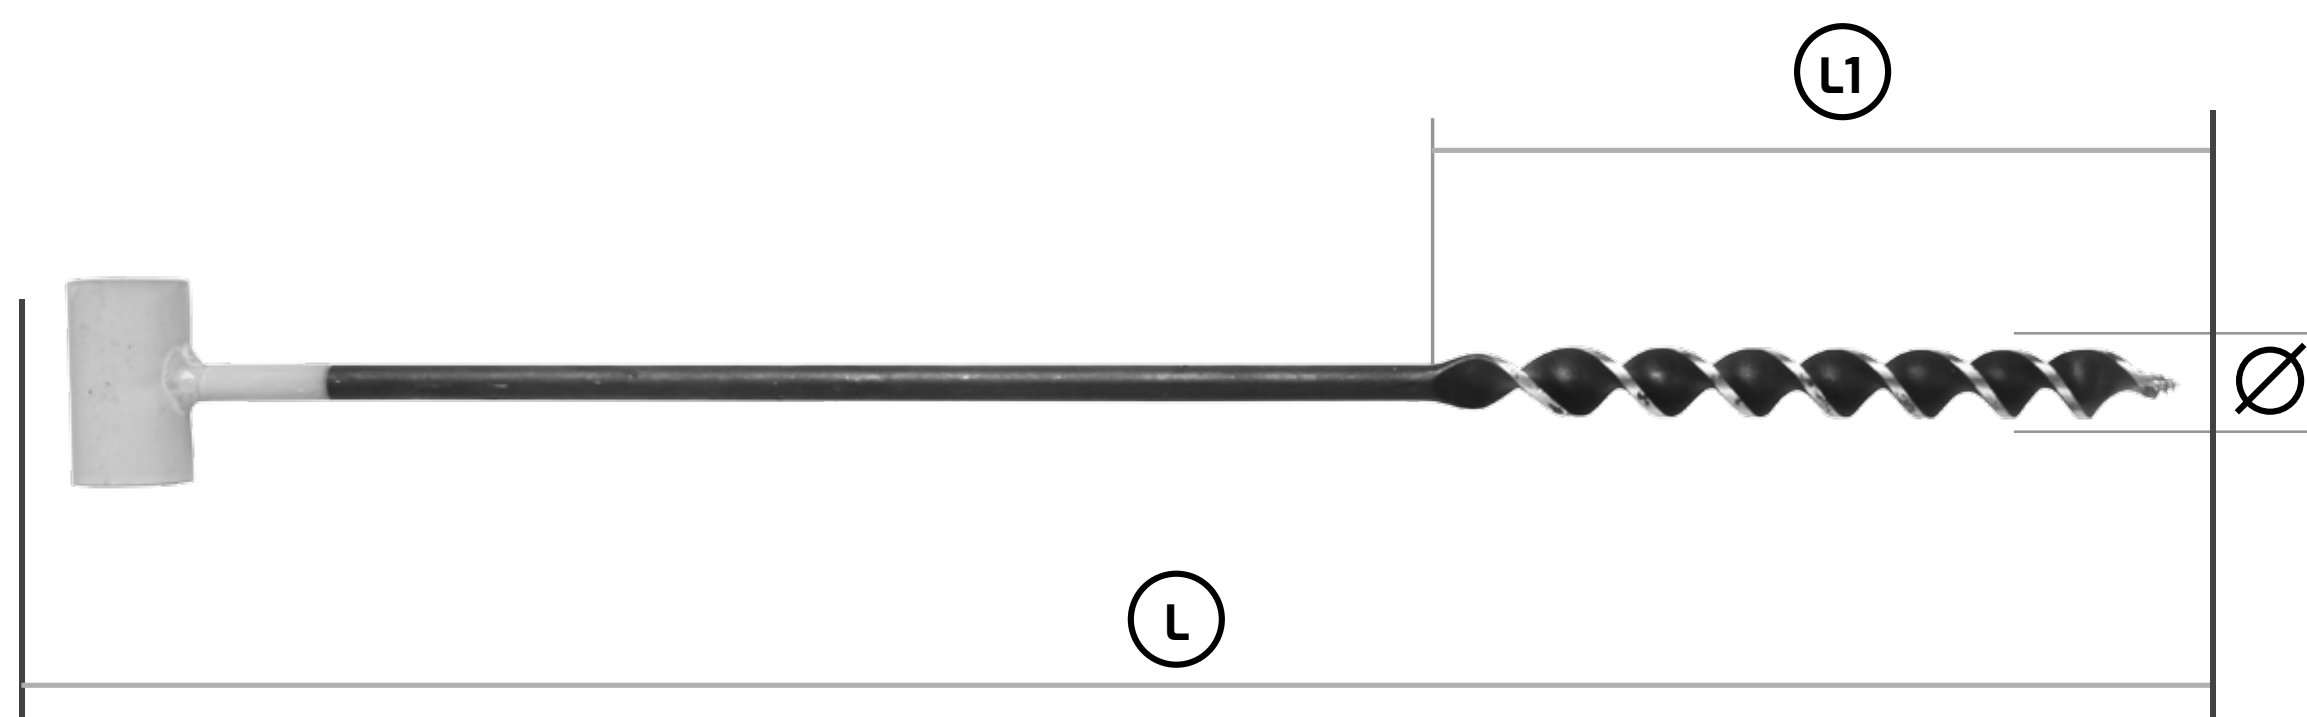

- Its high twist rate ensures an effective chip removal to avoid filling.

USES

- For deep boring in hard-woods.
- Used manually with a bar through the eye avoiding the use of additional tools.
