MANUAL DRILL BIT

POINT

- Designed to maximize the grip on the wood making it lighter to work with.
- Rectified edges improve its cutting capacity.

USE

- For brace drill of two or four jaws.
- Specially designed for hardwood.

SPIRAL

- Its high twist rate ensures/guarantees an effective chip removal to avoid filling.

PRISMATIC SHANK

- Easy to clamp without forcing the chuck.

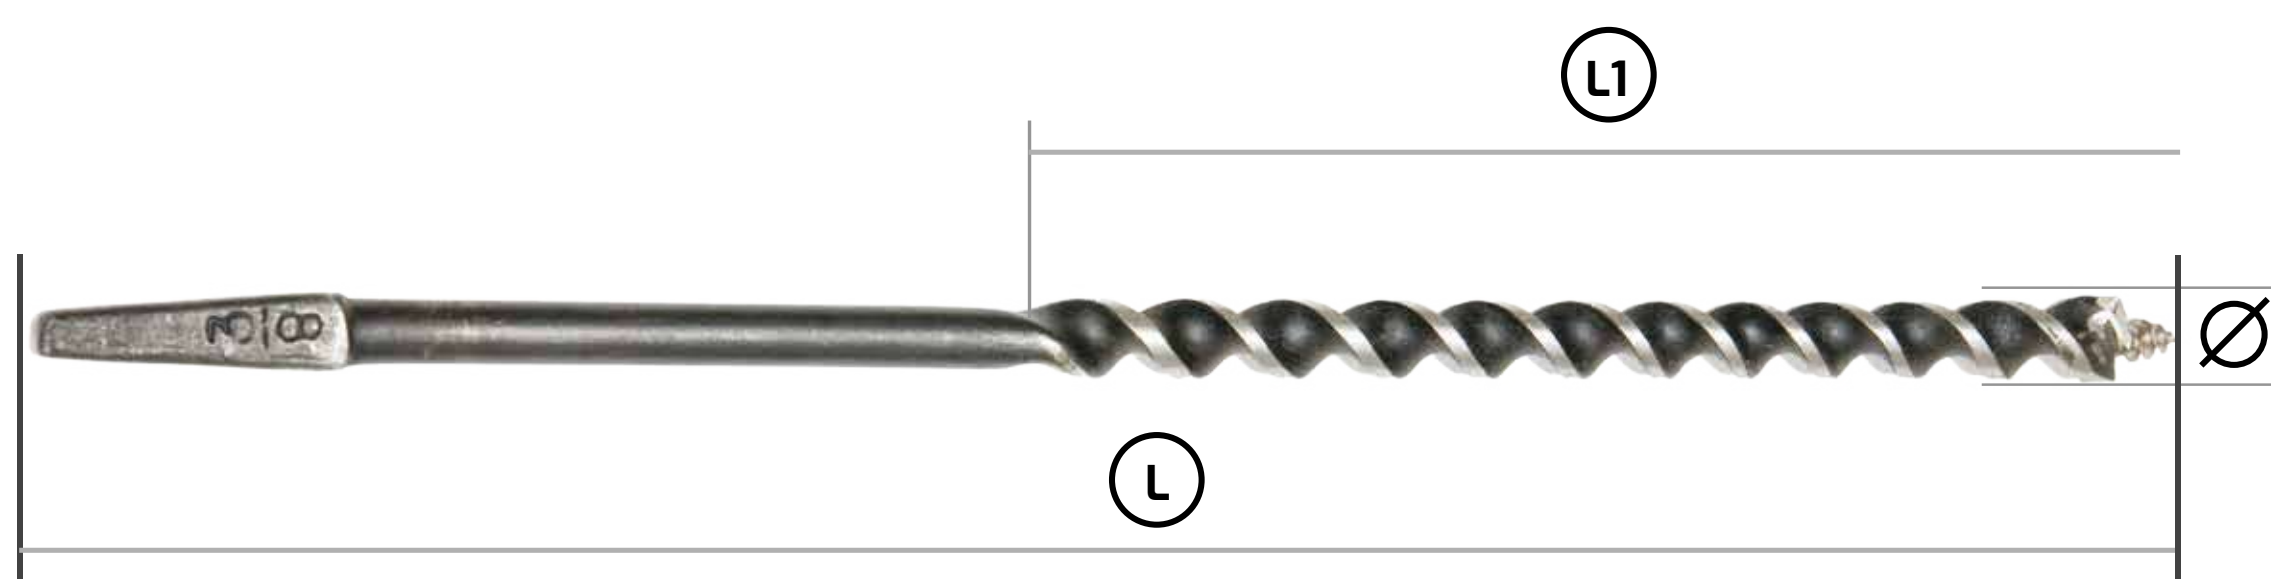

DURABILITY

Its unique design gives the best relation between hardness and flexibility, allowing the maximum number of holes without breaking.
